

Notes

1. All dimensions in metres.
2. Precast concrete planks to a span of 10m. For spans greater than 10m, use prestressed concrete beams and infill deck.
3. Road markings and signage deployed during construction phase to restrict traffic speed on the bridge and to limit loading to a single vehicle.
4. Minimum distance of 2 metres to maintain natural river embankment.
5. Cable ducts will be located under the bridge beams.
