

Key

- Proposed turbine locations
- Lines indicating the distance from the proposed turbines
- Existing Wind Farms
- Sequential Viewpoint Locations
- Wind farm would be theoretically visible
- Wind farm would not be visible
- 1-8 turbines may be theoretically visible
- 9-17 turbines may be theoretically visible
- 18-26 turbines may be theoretically visible
- 27-35 turbines may be theoretically visible

Notes: This drawing is based on a computer generated Zone of Theoretical Visibility (ZTV). The areas shown indicate the maximum theoretical visibility of the proposed turbines using OS Terrain 50 data only and do not take account of any screening from vegetation or built-form. The ZTV also includes an adjustment that allows for the Curvature and Light Refraction of the Earth.

This figure has been based on the following parameters:

|                      |                   |
|----------------------|-------------------|
| Turbine layout file: | LSTORNOWAY045.WFL |
| Hub height:          | 105m / 88m        |
| Rotor diameter:      | 150m / 136m       |
| Height to blade tip: | 180m / 156m       |

0 0.5 1 1.5 2 2.5 3 3.5 4km  
Scale at A3: 1:70,000
